IN THE SPECIFICATION

Please replace the paragraph starting on line 3 and ending on line 12 on page 31 with the

following new paragraph:

"The software components may be provided in as a series of computer readable instructions that may be embodied as data signals in a carrier wave. When the instructions are executed, they cause a processor, such as through a browser to perform the capture and editing steps as described. For example, the instructions may cause a processor to communicate with an information source, provide capture information from the time based stream of information on a first portion of a display, provide process information for constructing the presentation on a second portion of the display; and provide at least one enabled control element. Such instructions may be presented to the processor by various mechanisms, such as a plug-in, ActiveX control, through use of an application service provided or a network, etc."
